

ODT 2020

Record a ppt presentation with webcam

Create a professional account
Download the desktop application
Launch Zoom on your computer
Start a new meeting
Activate your video and microphone
Share your screen: choose your powerpoint presentation
Launch your powerpoint presentation
Adjust the size and location of the webcam window
When you are ready, press record.
You have the possibility to pause and resume your presentation by clicking on the corresponding option.
Once the powerpoint is finished, you can stop the recording.
Finish the meeting, the video file is then generated on your computer.
You can then send the video [here](#).

If an option is not visible, you can define your specific settings on the web page :
<https://zoom.us/profile/setting>

Perform initial tests to verify your image, sound and that you are comfortable with zoom and powerpoint.
